WORK EXPERIENCE

Edvanta | Full-Stack Engineer

Mar 2024 – Apr 2026

- Delivered feature enhancements and bug fixes across 20+ university websites (USC, King's College London, GWU) serving 100K+ monthly visitors, improving site performance and user experience.
- Integrated Shopify storefronts with existing university websites, enabling seamless e-commerce functionality without disrupting core site infrastructure.
- Built a multi-tenant Learning Experience Platform (LXP) Admin Dashboard using Next.js to manage courses, tenants, and recommendation-engine configuration, with Directus as the CMS/API layer and Supabase edge functions for real-time data sync.
- Engineered an AI-powered Recommendation Engine using LLM prompt engineering to process multi-step learner inputs and generate personalized, ranked course recommendations, improving course discovery.

Freelance

- Built a dynamic podcast website using Astro and the Spotify API with static site generation (SSG), delivering a fast, multi-page browsing experience.

STARTUPS

Finesse | Solo Founder

- Built and launched an AI-powered personal finance coaching app for Indian users using React Native (Expo), Node.js, and Supabase; parses bank SMS to auto-categorize transactions (Needs/Wants/Investments) and deliver personalized financial insights via the Gemini API.
- Published the app to the Google Play Store and grew it to 13 active users through direct outreach and user interviews, using qualitative feedback to guide the product roadmap.

Therapy Council | Co-Founder & Full-Stack Developer

- Co-founding therapycouncil.org, an online learning platform delivering psychology-focused courses, currently in active development.
- Leading full-stack development of the LMS platform, including course content architecture and the user-facing learning experience.
